Meteorologist Required

Speedwell is seeking an exceptional individual to join our team of meteorologists in our U.S. office. Candidates must have a degree in meteorology and experience working with meteorological data and forecasts. Eligible individuals must be hard working self-starters with experience in meteorological data processing, management, and data analysis. Responsibilities focus upon developing and implementing data quality control programs for producing cleaned data and meteorological Settlement Data. This position does not involve forecasting.

Potential candidates must be experienced with some of the following:

- Weather Risk Management
- Energy markets
- Commodity markets
- Statistical analysis
- Basic database scripting

Foreign language skills (especially Spanish & Portuguese) are desired, but not required.

The candidate must be willing to re-locate to Charleston, SC.

Founded in 1999, Speedwell Weather provides quality weather data, weather forecasts, software, and consultancy. With offices in the UK and the USA we serve clients in sectors including weather risk, energy, and agriculture world-wide.

Our data products include SuperPack® which provides clients group-wide access to our tens of thousands of high quality world-wide historical weather data sets and real-time feeds. We are the dominant provider of settlement data for parametric weather risk contracts.

If you feel that you have these skills send your resume to:

Speedwell Weather Corporation
